C2 Proficiency

Hobbies

Sweet tooth

Reading fiction and non-fiction

Playing games for relaxation

Yoga

Cat lover

Cinema Fan

Hello, I'm Jenny

In 2017 I made an aliyah from Russia. Moving to Israel gave me the opportunity to change my life and find an area in which I would prefer to work and grow.
I became interested in web development, because it combines various elements like creativity, technology, scientific research. Therefore you can learn new things and complete new tasks in different areas. It only depends on your imagination where you will develop.
At the end of 2020 I started learning HTML, CSS and JS on my own and since August I have taken Front-end web development courses at ITC academy.
Now I am looking for a junior position job in Front-end

Experience

till 2019	I have about 10 years experience as a general manager and PM in several internet shops and projects in Russia
2019 - 2021	Milim Writing & Translation Services **Project Assistant**

I was an email secretary: I received all emails, that were sent to our department and followed all the correspondence about the orders. I started each new job, accompanied it during the whole process until the final completion of the job.

Education

2006 - 2011	Master's degree in Art, The St. Petersburg State University of Film and Television
2013 - 2017	Bachelor's degree in History, St.Petersburg Institute of Jewish Studies
Dec.20 - Aug.21	Self-education
Aug - Nov. 2021	Front-end Development Program, Israel Tech Challenge
